

HELPING HEROES REALIZE
THEIR POTENTIAL THROUGH

Chiropractic Care

“Competing in these events has actually made my life ten times better and has given me tremendous self-worth. After any race, my upper body is in pain because I do it all with my hands and arms. Following chiropractic care, I find that I perform and feel better.”

— Iraq war veteran, Eric Frazier, leading hand cyclist who suffered a paralyzing injury to his spinal cord

DISABLED VETERANS VALUE CHIROPRACTIC CARE WHILE COMPETING IN TRIATHLONS

Several disabled war veterans—all members of the Team Semper Fi triathlon team—value chiropractic care for their health and in improving their abilities to effectively compete.

These veterans regularly compete in triathlons, venture races, marathons and 10 K races—competing against a variety of professional athletes, amateurs, and both disabled and able-bodied athletes.

Prior to these events and after, they are treated by chiropractors who support the Foundation for Chiropractic Progress. Dr Bill Morgan, Staff Chiropractor for the National Naval Medical Center in Bethesda, Maryland feels privileged to be a part of their extraordinary perseverance.
